DETAILED ACTION

Claim Rejections - 35 USC § 103

1. Rejections set forth previously under this section are withdrawn in view of the persuasive arguments in the 17 September 2007 appeal brief. See the reasons for allowance below.

Allowable Subject Matter

2. Claims 1-13 are allowed.
3. The following is an examiner's statement of reasons for allowance:

See the arguments presented on pages 16-20 of the 17 September 2007 appeal brief. The arguments contained therein have been reconsidered and are persuasive. The prior art does not teach or fairly suggest the claimed process of making a composite profile in which a crush rib is provided between the bottom surface of an insert piece and a channel and a step of pressing the insert piece into the first channel to deform the crush rib until the top surfaces of the insert and core are aligned.

Curtis and Pettersson are the closest prior art. However, neither reference teaches pressing an insert into a channel to deform a crush rib between the bottom surface of the insert piece and the channel until the top surfaces of the insert and core are aligned.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
